

**THE CHILDREN'S CAMPUS**  
**ROOM 2**  
**SEPTEMBER 2017**

**Dear Parents,** Please know our school and classroom are going through changes and to bear with the time constraint. Everyone is doing very well with communication skills.

School needs to be fun through learning and discovering subjects. This will continue thru the years of education as a child grows.

We will be making many faces and expressions to identify names of feelings. The use of "I statements" help recognize their personal self.

The idea of owning a pet is good for teaching unconditional love. Also caring for another living being is a great lesson in life. Veterinarians will be discussed this week.

The leaves will be changing color soon and falling off the trees. We will taste apple products and how they are grown. Leaves will be collected and explored.

**Weekly Themes:**

Sept.5-8	School
Sept. 11-15	Feelings
Sept. 18-22	Our Pets
Sept. 25-29	Autumn Leaves and Apples

**Home Connection:** Our summer was all about getting to know our routine and the friends we share our days with.

Please remember to layer clothing as the weather changes per season.

The students are growing fast and look for challenges indoors with fine motor skills and outdoors for gross motor skills and outdoor life. The children love watching bugs move for it's a smaller world than theirs.

**Reminders** . Potty training begins at home and will be encouraged at school. Make sure this step is relaxed and self taught with pride. Thank you.

Ms. Evelyn and Ms. Stephanie
